

Additional resource for seniors

The 2-1-1 Mass Vaccine Scheduling Resource line is now available for individuals 75 and older who need help with vaccine appointments and cannot access the website.

Please note, this 2-1-1 resource is only available to individuals age 75 and older who cannot use the internet, and translators are available to help. Callers will be able to speak with a live representative who can assist them with an appointment. It does not create increased access to appointments, and if no appointments are available, the caller will have the option to be placed on a call-back list for the mass vaccination sites.

When an appointment becomes available, callers will receive a call-back and appointments will be made on a first-come, first-serve basis.
